

# Optimal Storage Solutions Learning Objectives

---

At the end of this program, participants will be able to:

- Identify types and functionality of steel shelving
- Describe the types of high-density shelving
- Prepare for administering a proper storage survey to the customer
- Use your shelving application to contribute to LEED certification points

Here are a few examples of shelving types that will be discussed.

---

## Boltless Shelving

- Easy to assemble, easily modified, yet strong and able to accommodate a wide range of loads
- Consists of posts, horizontal beams and decking
- Particle board or steel mesh shelving

## Mobile Storage Carriages

- Highest capacity per square foot
- Lowest price per linear filing inch
- Can support a range of shelving types

## Clip-Type Multi-Level Shelving Systems

- Maximise vertical space without mechanical assistance
- Includes many shelf types and sizes.
- It can be disassembled and moved to other facilities
